

**Project Vanguard is an innovative program supported by a group of national providers who are generously donating resources to provide telehealth services, at no cost, to 100 families and their children with autism across the nation.**

**Project Vanguard's mission is to provide telehealth services to families and their children with autism, continuing to build upon the Celeste Foundation's successes and ultimately paving the way for Medicaid and private insurance reimbursement of telehealth behavior analytic services.**

**Project Vanguard is inviting professionals to share in this unique opportunity to learn about telehealth and be at the forefront of developing the reimbursement model using this innovative technology.**

**Project Vanguard is looking for like-minded clinicians excited by our mission and we are extending a unique opportunity to join us by applying today!**

## **What Professionals Can Expect**

- Receive a CNOW telehealth system and Telehealth Professional training at no cost, valued at over \$17,000.00**
- Attend a free 3-day intensive telehealth training in Mount Dora, Florida (travel, lodging and meals not included)**
- After training, donate 2-4 hours/week of pro-bono telehealth services for one year from your home or office at flexible times that will not interfere with work hours**
- Become part of an elite group of behavior analysts delivering services to families across the country using CNOW's telehealth system**
- Assist in setting the standards that establish the reimbursement model for behavior analytic services via telehealth**
- Continue the successes of the Celeste Foundation model on a wider-scale and to a larger audience, including families enrolled in Project Vanguard and others**
- Nominate a family of your choice to enroll in the program from your respective state**

**Stop by the CNOW Booth to complete an application and for more information**

## **PARTICIPATE IN A UNIQUE OPPORTUNITY TO PROVIDE TELEHEALTH BEHAVIORAL SERVICES TO FAMILIES ACROSS THE NATION**

- **Project Vanguard is accepting applications from BCBA's and BCaBA's who would like to participate in an exciting pilot program extending in-home services to 100 families and their children with autism at no cost to them**
- **Upon completion of our specialized three-day Telehealth Professional training program at the National Institute of Telehealth, donate between 2-4 telehealth hours per week to project families and others**
- **At the conclusion of the one year program, clinicians will receive the title/acknowledgement as a National Institute of Telehealth Professional (NITP) and the CNow system is theirs to keep to continue providing services**
- **Consultation and support from our Professional Advisory Board of nationally recognized experts is available to project members**
- **Be at the forefront in assisting with the development of Medicaid and private insurance standards to pave the way for the reimbursement of ABA services delivered by telehealth**
